

5 Axis Machinists & CNC Lathe operators

Dynomax Inc. a fast-growing manufacturer, is looking for an experienced, detailed-oriented machinist who can program, set-up and operate 5 axis CNC machines in our Wheeling, Il facility.

Dynomax Inc. is a leading precision manufacturing company serving the aerospace, defense, energy, and medical industries since 1986.

General Qualifications:

- Read and interpret blueprints
- Produce components to high tolerances
- Use precision measuring equipment
- Implement set up reduction initiatives

Required Qualifications:

- Must be able to operate 4 or 5 axis gantry/bridge mill machining centers
- 5 years minimum Mastercam (or equivalent) experience
- Programming experience utilizing Heidenhain or Fanuc Control Systems.

We strive to provide a friendly, clean and encouraging workplace. Our benefits include competitive wages, paid holidays and vacation, medical, dental, life and disability insurance coverage, flexible spending accounts, and 401k's.

If you are interested in being considered for this position, and posses the above qualifications, please send your resume to:
