

Contract Mastercam Programmer and CNC Operator

Work involves creating parts for assembly of three dimensional consumer product design, packaging, display and presentation models for review by design, engineering and marketing customers.

Will work as part of the Innovation Lab team under the supervision of shop manager, senior designer and senior model maker.

CNC Operator/Programmer

3+ years recent Programming and CNC experience required. Programming Mastercam X-series files from client provided CAD/Solidworks part files. 2D and 3D solids and surface part models as well as thermo-form mold work. Set-up and operation of 2010 Haas VMC. Must be proficient in programming and machining complex parts that require multi-axis operations. Part machining in urethane tooling board, acrylic, plastics and aluminum materials. Solid and thin wall parts with high level of precision and surface finish detail.

Must have good communication and organizational skills. Must be able to work independently with limited supervision. Must be proficient with Windows platforms. Mac knowledge (beneficial). Solidworks experience greatly beneficial.

Currently, work is contract only on a job-by-job basis. Project duration varies from one day to two weeks. Frequently, projects run simultaneously extending work opportunity. Some evening and weekend work is necessary. Second shift options may be considered. Pay is hourly, no overtime. Rate is commensurate with experience.

To apply for this opportunity please submit cover letter, resume and 3-4 work picture examples to Shop Manager. Email: modelmaker@thinkkaleidoscope.com
