

CNC Manufacturing Engineer/Programmer (10-year experience)

We have exciting opportunities in our growing CNC Departments. Our Senior Machinists set up and operate CNC lathes and Mills as we partner with our customers in the development of their latest products.

The qualified candidate has 10-years experience, puts quality first, demonstrates attention to detail, is willing to learn and train others, and is experienced in close-tolerance machining. Highly skilled in Solidworks and MasterCam 5-Axis programming.

Convinced one company is the same as another? Come see why our employees think differently. This is an outstanding opportunity with a special company. We offer competitive compensation and a comprehensive benefits package.
