Job Description

- Write and optimize CNC programs to create parts on live tool lathes, 3 axis vertical and 4 axis horizontal machining centers
- Create proper documentation including tool sheets, set up instructions, and operator work instructions
- Determine tool requirements
- Setup and prove out program if needed
- Prepare and complete all paperwork required for an ISO14001: 2015 Certified shop
- Provide feedback and make suggestions to improve manufacturing efficiencies

Qualified candidates will possess the following:

- 5 years' experience in CNC programming preferred
- Strong machining background
- Mastercam experience a plus
- Solid understanding of G and M Codes
- Understand of Macro Programs a plus
- Must have a good understanding of blue print reading, dimensioning and tolerances
- Must have excellent setup skills and knowledge of best practices (including tooling and fixturing)
- Must be able to trouble shoot problems and problem solve with minimal supervision
- Must be able to use all shop inspection tools to inspect finished parts as tight as +/- .0002 ensuring company quality standards are kept
- Must have good communication skills and be a TEAM player!

Bogar Enterprises

Why Work Here?

Growing business with so much potential!

Since 1984, Bo/Gar has specialized in providing prototypes, pilot builds, and production solutions. Bo/Gar has been able to assist customers in manufacturing and assembling complex controls by delivering a superior product on-time that meets or exceeds the customer's needs. We have an outstanding record of accomplishing this with our state of the art equipment; such as, CNC Lathes, CNC Mills, Coordinated Measuring Machines and a Robotic Cell (to name a few). These help us provide our customers with world class manufacturing and assembly capabilities to fulfill their needs.

For over 35 years, we have prided ourselves on our quality of work and realize that our reputation is one of our most valuable assets.
