

CNC Programmer-Lathe or Mill
Automated Manufacturing Inc
<https://automatedmfginc.com>

Automated Manufacturing is looking for someone to join our team as a CNC Lathe or Milling programmer. We run mostly Fanuc controls, and have twin spindle full machining capabilities. Must have set-up and running experience. It's a clean and air conditioned environment, with a great group of people, like family, in a small shop. Compensate pay per skill level.

Responsibilities

- Create programs and fixtures for all jobs given for several machines and machinists.
- Select proper tooling for material for efficiently manufacture parts.
- Must be able to interpret drawings and models for dimensions, features, and tolerances.
- Program with tight tolerance parts, 1-1000 qty., most jobs are 1-2 pieces.
- Ability to problem solve and critical thinking of complex parts.
- Create tool lists for each job.
- Communicate with machinists on setup and running procedures.

Qualifications

- 2 years+ Programming experience in Mastercam or Gibbs
- Setup and Operating experience
- Read and interpret prints and models.

Benefits

- Flexible Hours
- Health/ Dental/Vision Insurance
- 401k with employer match
- Paid Vacation and Holiday
